

IPC Private Wealth Visio Global Advantage Balanced Pool

This Pool provides access to professional portfolio managers who invest in a relatively smaller, concentrated set of equities and a select portfolio of investment grade bonds, and provides enhanced diversification through international ETF holdings. Mawer, the active equity sub-advisor, selects wealth-creating companies run by strong management teams with a compelling business model that may be trading at a discount to their intrinsic values and are growing faster than markets. The Pool's asset class weightings will generally be 50% to 70% in equity securities and 30% to 50% in fixed-income securities. We maintain the optimal target mix by strategically and automatically rebalancing the Pool regularly.

Key reasons to invest in this portfolio:

- You want a sophisticated, yet simplified solution that provides access to a concentrated selection of equity and fixed income securities combined with ETFs
- A globally diversified portfolio that provides a transparent and understandable investment approach
- A balance of regular income with the potential for capital growth
- Low to Medium tolerance for risk
