INTERIM MANAGEMENT REPORT OF FUND PERFORMANCE | September 30, 2023

Management Discussion of Fund Performance

November 13, 2023

This Management Discussion of Fund Performance presents the views of Counsel Portfolio Services Inc. ("Counsel") on the significant factors and developments during the period ended September 30, 2023 that have affected the Fund's performance and outlook. For information on the Fund's longer-term performance, please refer to the *Past Performance* section of the report.

In addition, net asset value (NAV) refers to the value of the Fund or a series, as calculated for transaction purposes, on which the discussion of Fund performance is based.

Results of Operations

Investment Performance

The performance of the Fund's Series A securities is discussed below. The performance of all other series offered by the Fund is shown in the *Past Performance* section of this report. Where series returns differ, it is primarily because different levels of fees and expenses were charged to each series, or because securities of a series were not issued and outstanding for the entire reporting period. Please refer to the *Series Information* section of this report for the varying management and administration fees payable by series.

During the six-month period, the Fund's Series A securities returned -4.13% (after deducting fees and expenses). This compares with a -1.13% return of the broad-based S&P/TSX Composite Total Return Index and a -0.58% return of the style-based MSCI Canada Value Index. All index and series returns are calculated on a total return basis in Canadian dollar terms. Investors cannot invest in an index without incurring fees, expenses and commissions, none of which are reflected in the index return.

Canadian equities declined over the period, driven lower by rising interest rates and slowing economic growth. Elevated inflation persisted, which prompted the Bank of Canada to raise its policy interest rate. Canadian energy equities benefited from the production cuts made by the Organization of the Petroleum Exporting Countries, which kept energy prices relatively high. The labour market was robust but showed signs of softening as the period progressed. Within the S&P/TSX Composite Index, Healthcare, Energy and Information Technology were the strongest sectors, while Communication Services, Utilities and Materials were the weakest.

The Fund underperformed the broad-based index primarily due to underweight allocation to Energy, overweight allocation to Communication Services, and security selection within the Information Technology sector. The broad-based index is designed to measure the performance of the overall Canadian equity market, whereas the Fund invests with a focus on value-oriented equities. Given the Fund's composition, the style-based index provides a more meaningful comparison for relative performance. The Fund underperformed its style-based index due to an overweight allocation to Consumer Staples and Communication Services sectors, and underweight allocation to Energy.

Net Assets

The Fund's NAV declined by \$11.2 million, or 12.8%, to \$76.5 million as at September 30, 2023, from \$87.7 million as at March 31, 2023. Of this decrease, \$8.6 million was attributable to net redemptions and \$2.6 million to investment performance (after deducting fees and expenses).

Fees and Expenses

The annualized management expense ratio ("MER") for each series during the period ended September 30, 2023, was generally similar to the MER for the year ended March 31, 2023. Total expenses paid vary from period to period mainly as a result of changes in average assets in each series. The MERs for all series are presented in the *Financial Highlights* section of this report.

Recent Developments

The sub-advisor notes that inflation and the response of central banks continues to be a major factor impacting equity markets worldwide. The year-over-year Consumer Price Index reading in Canada tracked upwards in August, emphasizing the challenge of bringing inflation back down to central banks' 2% target. While the Bank of Canada elected to pause its hiking cycle at its September meeting, officials indicated that further hikes are possible if inflation persists. A sell-off in global bond markets has also gathered pace over the past month as yields on 10-year U.S. Treasuries reached their highest level since 2007 by the end of the quarter. This uncertain landscape does present opportunities to purchase high-quality businesses when they are out of favour.

On April 3, 2023, The Canada Life Assurance Company announced an agreement to acquire Investment Planning Counsel Inc. (the parent company of Counsel). The transaction is expected to be completed prior to the end of 2023. During the initial period following completion of the transaction, Counsel will continue to operate as manager of the Counsel Funds and no material changes to the Fund's operations are expected. However, there will be changes to the membership of the Fund's Independent Review Committee and Counsel's Board of Directors in connection with the completion of the transaction.

Related Party Transactions

Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by the Manager to pay for: costs of managing the investment portfolio; providing investment analysis and recommendations; making investment decisions; the purchase and sale of the investment portfolio; and providing other services. The Manager also used the management fees to fund trailing commissions and other compensation (collectively, "Distribution Related Payments") paid to registered dealers and brokers whose clients invest in the Fund.

The following dealers affiliated with Counsel may be entitled to Distribution Related Payments from Counsel on the same basis as unrelated registered brokers and dealers: IPC Securities Corporation, Investors Group Securities Inc., IPC Investment Corporation, Investors Group Financial Services Inc., and Quadrus Investment Services Ltd.

Counsel used approximately 41% of the total management fee revenues received from all Counsel funds to fund Distribution Related Payments to registered dealers and brokers. In comparison, such Distribution Related Payments for the Fund represented 44% of the management fees paid. This amount is an average percentage of the management fees paid by all series. The actual percentage for each series may be higher or lower than the average depending on the level of trailing commissions paid for that series.

Management and Administration Services

For each applicable series, the Fund paid management fees and administration fees to Counsel at the annual rates specified under *Series Information* in this report and as more fully described in the Simplified Prospectus. In return for the administration fees, Counsel pays all costs and expenses (other than certain specified fund costs) required to operate the Fund. See also *Management Fees*.

Other Related Party Transactions

Other investment funds managed by Counsel ("Top Funds") invest in Series O securities offered by the Fund on a prospectus-exempt basis in accordance with the investment objectives of those funds. Series Private Wealth securities are issued on a prospectus-exempt basis to investors in discretionary managed account programs offered by IPC Securities Corporation, an affiliate of Counsel. As a result of these investments, the Fund is subject to large transaction risk as discussed in its Simplified Prospectus. Counsel manages this risk to reduce the possibility of any adverse effect on the Fund or on its investors, through such processes as requiring advance notice of large redemptions. At September 30, 2023, Top Funds owned 60.3% of the Fund's NAV and Series Private Wealth investors owned 7.4% of the Fund's NAV. As of September 30, 2023, Counsel had not received notice of any large redemptions. All related party transactions are based on the NAV per security on each transaction day.

Counsel is a subsidiary of IGM Financial Inc. ("IGM"). IGM is a subsidiary of Power Corporation of Canada. Companies related to Power Corporation of Canada are therefore considered affiliates of Counsel. As of September 30, 2023, the Fund held an investment in Great West Lifeco Inc. ("GWL") valued at \$1.2 million. GWL is also the parent company of Canada Life. This investment is in accordance with standing instructions approved by the Counsel Funds' Independent Review Committee ("IRC") and represents 1.5% of the Fund's net assets. The IRC issued the approval on the basis that these investments would be made in compliance with Counsel's policies. Counsel's policies are designed to ensure that the related party transaction:

- is made free from any influence by an entity related to Counsel and without taking into account any considerations relevant to an entity related to Counsel;
- (ii) represents the business judgment of the sub-advisor, uninfluenced by considerations other than the best interests of the Fund; and
- (iii) achieves a fair and reasonable result for the Fund.

Past Performance

The indicated rates of return are the historical annual compound total returns, including changes in NAV per security and assuming reinvestment of all distributions. They do not take into account sales, redemption, distribution or optional sales charges, management fees directly payable by investors or income taxes payable by any investor that would have reduced returns. Returns for each series primarily differ because fees and expenses vary for each series. Please refer to *Series Information* for further information. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

If you hold this Fund outside of a registered plan, income and capital gains distributions paid to you increase your income for tax purposes, whether paid in cash or reinvested in additional securities. The amount of reinvested taxable distributions is added to the adjusted cost base of the securities that you own. This would decrease your capital gain or increase your capital loss when you later redeem from the Fund, thereby ensuring that you are not taxed on this amount again. Please consult your tax advisor regarding your personal tax situation.

Year-by-Year Returns

The bar charts show how much an investment made on the first day of each financial year would have increased or decreased by the end of the respective periods. For the first year of a series, the percentage shown will be the actual return of the series from its inception date, which can be found under *Series Information*. The charts illustrate how the Fund's performance has changed over time.

- (1) This information is provided as at the end of the fiscal period shown.
- (2) MER and MER before waivers or absorptions ("Gross MER") are based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily NAV during the period. In the period a series is established, the MERs and Gross MERs are annualized from the date of inception to the end of the period. MER and Gross MER may be impacted by decreases and/or increases in management fees and/or administration fees as discussed under Series Information. Where the Fund invests in securities of an Underlying Fund, the MERs and Gross MERs presented for the Fund include the portion of MERs of the Underlying Fund(s) attributable to this investment.
- (3) The trading expense ratio ("TER") represents total commissions and other portfolio transaction costs incurred as an annualized percentage of the daily average NAV during the period. Where the Fund invests in securities of an Underlying Fund, the TERs presented for the Fund include the portion of TERs of its Underlying Fund(s) attributable to this investment.
- (4) The portfolio turnover rate ("PTR") indicates how actively the portfolio advisor manages the investments. A PTR of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher PTR in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high PTR and the performance of the Fund. Costs incurred to realign the Fund's portfolio after a fund merger, if any, are excluded from the PTR.
